CT: Surveillance & Analysis Division Plan for Minnesota Department
of Health PAH Analysis for the St. Louis Park Area
FROM: *W. Sanders*
William H. Sanders III, Director
Surveillance and Analysis Division
TO: Charles H. Sutfin, Director
Water Division

This memorandum is in response to your memorandum of January 8, 1980, requesting Surveillance & Analysis Division assistance in the above subject area. The Central Regional Laboratory and Quality Assurance Office have reviewed the situation and have concurred with the following course of action:

1. During the month of February, the CRL will prepare a series of reference samples and forward the same to the Minnesota Department of Health Laboratory (MNDH) for analysis.
2. The QAO has previously completed an on site laboratory evaluation. These findings, plus the subsequent results from the reference sample analysis, will be reviewed to determine the quality of data from the MNDH Laboratory.
3. If problems are found, technical assistance will be provided to correct the analytical situation.

At the conclusion of our investigation the QAO will provide a summary report on the findings and corrective actions taken.

If you have questions and desire further discussion on the above, refer the same to Curtis Ross or James Adams.
